
MohanaVarshaSri Kandula

Ongole, Andhra Pradesh

kandulamohana14@gmail.com

Summary

Java-focused Computer Science graduate (2027) with strong fundamentals in **Object-Oriented Programming, Data Structures, JDBC, Spring Framework, and Spring Boot**. Hands-on experience in backend development, REST APIs, database-driven applications, and analytics platforms. Passionate about building scalable Java backend systems and enterprise applications.

Education

- **Bachelor of Technology (B.Tech) – Computer Science and Engineering**
Rajiv Gandhi University of Knowledge Technologies (RGUKT), Ongole
2023 – 2027
CGPA: 9.3 / 10
-

Skills

Java, Python, Spring Boot, JDBC, REST APIs, MySQL, HTML, CSS, Bootstrap, React, Git, Maven, Postman, Cloud Computing

Experience

Certifications

- NPTEL – Cloud Computing – 95%
- NPTEL – Artificial Intelligence: General Problem Solving Methods – 77%

ProjectsTutorTrace – AI-Powered YouTube Analytics Platform

- Developed a full-stack analytics platform with search, trend analysis, SEO insights, and performance predictions.
- Implemented structured REST APIs and integrated YouTube Data API for real-time analytics.

Government Scheme Analyzer (AI-Sahayak)

- Built an AI-driven backend system for extracting government scheme data using a multi-layer fallback approach.
- Generated structured summaries using LLMs with translation, PDF export, voice output, and smart Q&A features.

Airbnb-Style Web Application

- Implemented a property listing and booking platform with CRUD workflows and database integration.
- Strengthened understanding of backend workflows and full-stack interaction.

Internship Experience

Virtual Intern – WellNest: Smart Health & Fitness Companion

Infosys Springboard Virtual Internship

Working on backend logic, APIs, and data handling for a smart health and fitness companion application.

Applying Java and database concepts to real-world health and fitness modules.

Gaining exposure to software development lifecycle (SDLC) and best coding practices.
